

NinjaTrader Charting Basics

NinjaTrader Charts allow the professional trader to utilize analytical tools that help facilitate successful trading decisions. This session is designed to educate the user in the following areas:

- Creating a chart
- Chart display overview
- Chart properties
- Adding indicators
- Managing chart templates
- Navigating a chart
- Using drawing tools
- Trading through Chart Trader

Plan to attend this session if you want to maximize your efficiency in utilizing NinjaTrader Charts for technical analysis and trade decision support. Many of our users find the combination of integrated charts with advanced order and position management an unbeatable combination giving them an edge over other traders. After completing the Charting Basics training session, you will:

- Know how to setup and create a customized chart
- Know how to add and configure indicators
- Know how to save and re-use chart templates
- Know how to navigate a chart
- Know how to use drawing tools
- Place, modify and cancel orders within the chart

Participation is free so please attend if you are a first-time visitor, new user or an existing user. These sessions are always informative and keep you up-to-date on any enhancements and features we add to NinjaTrader Charts.

NinjaTrader Chart Trader

Imagine being able to watch your chart indicators for the right trade signals and then execute orders directly within the chart! NinjaTrader allows you to conduct your technical analysis and trade in real-time using the same advanced chart window and in this training session we cover the basics of getting started with this exciting feature. This session is designed to educate the user in the following areas:

- How to enable Chart Trader
- Order submission
- Order modification
- Order cancellation

- Chart Trader Properties
- Using Advanced Trade Management (ATM) strategies with Chart Trader
- OCO (One cancels other) orders

Plan to attend this session if you want to maximize your efficiency in utilizing NinjaTrader Charts for trading. Many of our users find the combination of integrated charts with advanced order and position management an unbeatable combination giving them an edge over other traders. After completing the Chart Trading with NinjaTrader session, you will:

- Know how to setup and navigate through Chart Trader
